

MISSION

MISSION

To supply the semiconductor and semiconductor process equipment industries with the purest, most reliable, most competitively priced, and state-of-the-art components for wet processing equipment and to provide unprecedented customer support and service.

A DREAM COME TRUE – PURE AND SIMPLE

What began in 1992 as a father and sons' ingenious dream to design a high-purity, more durable pump for the semiconductor industry has quickly resulted in a multi-million-dollar success story with customers in the United States, Asia, and Europe. It simply took a lot of hard work, dedication, and ingenuity to get the company where it is today — an industry-leading manufacturer of innovative pumps.

White Knight Fluid Handling, Inc. offers more than 20 size/model combinations of reliable, high-quality pumps that, in most

cases, can be shipped within 24 hours. White Knight's product availability and fast delivery can save your bottom line during a downtime emergency.

PURITY ISN'T A VIRTUE. IT'S A NECESSITY.

It is vital in the semiconductor industry that none of the elements used to manufacture pumps cause contamination in, or are degraded by the chemicals (or gases from the chemicals) that are pumped. At White Knight, we understand the importance of purity in both the material and the manufacturing environment, and we go to great lengths to guarantee the purest pumps.
